PROFILE

Developer with more than three years of experience researching solutions based on Computer Vision, Deep Learning, and IoT (currently a FINEP scholarship recipient). Experienced in applying convolutional, recurrent, and Transformer-based neural networks, as well as Retrieval-Augmented Generation for response generation and hallucination mitigation in language models. Also works on software development and architecture applied to product organization, modularization, and scalability.

HARD SKILLS

- Python | PySpark | C++ | Java | SQL (PostgreSQL, BigQuery) | NoSQL | Git | Linux
- PyTorch | TensorFlow | Computer Vision | Image Processing | Deep Learning | CNNs | RNNs | Transformers | RAG | IoT
- Software Architecture | MVC | MVVM | ADRs | Scrum | Kanban | ISO Standards | Accessibility

EXPERIENCE

Software Engineer (Freelancer) | Workana

June 2026 – Present

- Work on defining and applying architectural patterns (MVC and MVVM), producing ADRs (Architecture Decision Records), diagrams, and technical documentation.
- Translate functional and non-functional requirements into system components and modules, in direct collaboration with developers.
- Participate in code reviews focused on long-term maintainability.

Junior Technical Writer (Freelancer) | Workana

November 2023 – May 2026

- Produced technical documentation for systems and APIs in a fully Spanish-speaking work environment.
- Collaborated with development teams on requirements gathering and product scope definition.

IT Intern | Public Prosecutor's Office of the State of Rio Grande do Norte (MPRN)

June 2025 – Present

- Diagnosed and resolved technical hardware, software, and infrastructure issues in an institutional environment.
- Installed, configured, and managed systems (Linux and Windows).
- Documented and tracked technical support tickets.

Undergraduate Research Fellow (PIBIC) — Development of an IoT Architecture for Water Resource Monitoring | UERN

September 2024 – August 2025

- Developed a prototype for monitoring aquaculture production using Arduino, sensors, Python, and C++.
- Integrated ML models with PyTorch for data analysis and decision support.
- Took part in field validation of the solution at the Jundiá Agricultural School (EAJ/UFRN), with a mobile app for real-time indicator and alert visualization.

FINEP Scholarship Recipient — Development & Research in Assistive Technology (TECIncluir) | UERN / UFRN / UFRRJ

November 2025 – Present

- Developing the institutional portal for LATECE (UFRN's Assistive Technology Laboratory), defining the system architecture and implementing a web platform with an administrative dashboard.
- Using Nuxt.js 3 and Vue.js on the front-end, and Node.js with TypeScript on the back-end, integrated with PostgreSQL.
- Applying accessibility guidelines for users with visual, hearing, and cognitive disabilities.

EDUCATION

Bachelor's Degree in Computer Science | Universidade do Estado do Rio Grande do Norte (UERN)

March 2023 – Present (in progress) — Natal, RN

Electromechanical Technician | SENAC

March 2024 – April 2026 — Natal, RN

**Environmental Science and Management Technician | Centro Estadual de Educação Profissional João Faustino
Ferreira Neto (CEEP)**

February 2020 – November 2022

SOFT SKILLS

Proactive profile, with strong ability to work in teams with people of different profiles, handles tight deadlines well, and maintains emotional composure under pressure.
